

# Ankit Bhatia

FRONTEND DEVELOPER | 15+ YEARS IN WEB TECH & TEAM LEADERSHIP

## Professional Summary

Results-driven frontend developer with 15 years of hands-on experience in building high-performing, user-focused web applications. Skilled in modern frameworks and best practices, with a strong focus on maintainability, scalability, and clean UI/UX. Proven ability to lead teams, mentor developers, and collaborate across functions to deliver quality outcomes on time.

Known for a proactive approach to problem-solving, continuous learning, and a commitment to innovation. Seeking a new opportunity to contribute technical expertise, leadership, and creativity to a forward-thinking organisation in the tech space.

## Employment History

### Lead Software Engineer - Frontend, SBER Bank, Bengaluru

10/2024 - 04/2025

- Successfully integrated **Zustand** to streamline state management for modal windows, improving both performance and user experience across the application.
- Developed robust and reusable **React components**, enhancing application performance and consistency across the UI.
- Improved overall **code quality** by implementing **TypeScript** and enforcing standards through **ESLint**, resulting in fewer bugs and easier long-term maintenance.
- Led regular **code reviews**, identifying areas for improvement and embedding best practices to lift code quality, boost maintainability, and support team-wide consistency

### Senior Frontend Developer - II (Principal Engineer), Novorise Fintech Pvt Ltd, Gurugram

09/2021 - 09/2024

- Delivered the Express ACH feature** for the core banking platform, directly contributing to a **\$200,000 revenue increase** within the first month of launch.
- Developed the Novo Funding solution**, enabling small businesses to secure funding and driving approximately **\$10 million in loans** within six months.
- Led frontend development** for the **Debit Card feature**, covering both the customer interface and internal admin portal—this feature became the **top revenue generator**, accounting for **60% of total income**.
- Spearheaded migration** from JavaScript to TypeScript and proactively addressed security vulnerabilities, significantly improving both **code quality** and **application security**.
- Oversaw code reviews** and maintained clear, structured **documentation**, supporting knowledge sharing and onboarding within the engineering team.

### Frontend Lead, Epsilon Conversant, Bengaluru

12/2019 - 09/2021

- Successfully lead and managed multiple teams of 5-7 developers each, ensuring **effective collaboration** and project delivery.
- Reduced **overall development time** by creating streamlined processes for the frontend team and aligning development workflows with AEM.

## Working Knowledge

MongoDb, Postgres  
NextJS, Vite  
AWS, Github, Gitlab  
Figma, Lottie, Canva  
Wordpress, Wix

- Delivered **significant impact** in the Digital Division by developing internal tools for the sales and management departments using the **MERN stack**, which were later showcased to secure external project bids.
- As the **representative and manager** between the frontend team and the client, I successfully facilitated **seamless communication** and ensured project alignment, resulting in the **timely and efficient delivery** of high-quality solutions.
- **Hired and coached** a large team of UI developers for both junior and senior roles.

**Technical Lead, TEKSystems, Bengaluru**

05/2019 - 12/2019

- **Led and mentored** a team of 3 developers, supporting growth and performance.
- **Liaised directly with the client** to manage updates, progress, and timelines.
- **Introduced a structured code review process**, reducing technical debt by 30%.

**Sr. Interactive Developer, Sapient Consulting, Gurugram**

02/2014 - 05/2019

- Delivered innovative features for **Fidelity's Personal Investor** division, boosting traffic and user engagement.
- Built high-quality **AEM components** for the **MFS web app**, contributing to overall project success.
- Managed direct **client communication** and actively supported planning, grooming, and delivery phases.
- Applied **Agile practices** effectively, earning client praise for improving team productivity and outcomes.

**Lead Engineer, HCL Technologies, Noida**

04/2011 - 01/2014

- **Solely managed** the frontend of the client's web app, maintaining **100% billability** and delivering high-quality outcomes.
- Introduced **jQuery** to enable advanced features and improved UX through animations.
- Developed custom **jQuery plugins** (e.g. accordions, carousels, popups, infinite tabs), enhancing functionality and user engagement.

**Software Development Engineer, Treystaa Services, Delhi**

08/2009 - 12/2010

- Built a **comprehensive reports feature** using **jQuery** and **ActionScript 3**, adding strong value to the product.
- Created **interactive video demos** in **Adobe Flash**, supporting marketing efforts and helping product owners showcase features effectively.

**Web Designer, Vinove Software & Services, Delhi**

07/2008 - 07/2009

- Converted **3-4 PSDs daily**, increasing efficiency and contributing to revenue growth.
- **Trained junior designers** in XHTML, CSS, and JavaScript, lifting team capability.
- Led frontend development for **invoicing and money management** tools, scaling them from PoCs to revenue-generating products.

**Education**

**Bachelor of Science in Information Technology,  
Sikkim Manipal University**

08/2004 - 01/2008
